- Strong ability to grasp new concepts quickly and utilize them in a productive manner
- Provided end-to-end support to clients.

## EDUCATION

- **Dr.Homi Bhabha State University – Elphinstone College , Churchgate (Fort) Mumbai - 2024**

## PROJECT EXPERIENCE:

**Client: Schindler**

**Role: RPA Developer**

**Project 1: Cost Estimation**

**Responsibilities:**

- The bot opened IBM Lotus Notes using the command line.
- The bot downloaded all required files and created estimations.
- The bot filtered out data and stored all estimation files into one single Excel file.
- The bot sent reports with Excel sheets via mail.
- The bot validated estimation data to ensure accuracy before sending reports.
- The bot maintained a detailed log of all activities for auditing purposes.
- The bot automated error-handling mechanisms to manage unexpected file formats or missing data.

**Client: JnJ**

**Role: RPA Developer**

**Project 2: Neostrata DMT**

**Responsibilities:**

- The bot retrieved files from a remotely connected computer and stored them in a local folder.
- It processed and sorted various inventory files into designated folders.
- The bot logged into the Neostrata ERP portal via the website.
- It uploaded and processed files, sending a success email for each processed file.
- In case of errors, the bot promptly sent an error email to the client.
- Detailed logs were maintained for tracking and auditing purposes.

**Client: Panda**

**Role: RPA Developer**

**Project 3: Stock Analysis Reports – Nasdaq**

**Responsibilities:**

- Scraped data from the Nasdaq website under the 'Most Advanced + Declined' category.
- Retrieved historical quotes for a six-month timeframe and formatted the data as required.
- Automated email notifications to send formatted reports to the client.
- Interacted with the client for requirement gathering and process understanding.
- Analyzed and documented the complete business process for automation.
- Designed and customized the framework with robust exception handling.
- Developed, tested, and deployed the automation as per the process flow.

**Client: JnJ**

**Role: RPA Developer**

**Project 4: Janssen Daily Report**

**Responsibilities:**

- The bot logged into the desired website and applied the filter.
- The bot selected dates between today and 7 days before.
- The bot filtered out data and exported it into an .xml file. After that, it performed data table activities and executed some Excel filter operations.
- The bot sent reports with Excel sheets via mail.
